Mess^{rs} Mackenzie and Moncur
 You are hereby appointed
 Hothouse Builders and Heating Engineers
 to His Royal Highness The Prince of Wales.

Given under my hand and seal
 at Marlborough House,
 this first day of March 1892

J. M. P. Jr.
 Comptroller.

This Warrant is granted
 to Wm. Alexander Mackenzie, William Alexander Mackenzie
 personally, trading under the firm of
 Mess^{rs} Mackenzie and Moncur,
 and is to be returned to the Comptroller of the Prince of
 Wales Household on the event of any change taking place
 in the firm from death, retirement, or other cause.

EDINBURGH, LONDON, AND GLASGOW.

MACKENZIE & MONCUR, LTD.,
HOTHOUSE BUILDERS,
HEATING AND VENTILATING ENGINEERS,
EDINBURGH, LONDON, AND GLASGOW.

N submitting their Abridged Catalogue, take the opportunity of respectfully thanking their numerous Patrons and friends throughout the United Kingdom who have so largely supported them during past years.

In this Catalogue are given a number of Designs for Conservatories, Greenhouses, Pavilions, Verandahs, Summer Houses, etc., and a few Designs for Ranges of Glass Houses, all from Buildings which have been erected by the Company. Their full Catalogue contains additional Designs, and it will afford them pleasure to forward copies of same on application, when it is proposed to erect Buildings of larger dimensions, such as Winter Gardens, Palm Houses, and Ranges of Fruit and Plant Houses.

As the cost of Horticultural Buildings varies very considerably according to the nature of the fittings and local requirements, and is, of course, affected by the price of materials and rate of wages, M. & M. do not issue a Price List, but they will be glad to quote for any of their Designs, or to furnish Estimates from Drawings

EDINBURGH, LONDON, AND GLASGOW.

sent to them. When a Range of Hothouses or a Conservatory is proposed to be erected, the usual course is to visit the site and thereafter prepare special Drawings and Estimates.

M. & M. would draw special attention to the greatly increased facilities they now possess in their New Premises for the manufacturing and erecting Horticultural Buildings of every description in Wood or Iron ; as also Verandahs, Pavilions, Summer Houses, Wood Erections, etc. Their Works have been specially built, and are extensive and complete (covering about three acres of ground), as will be seen from the accompanying plan. Each workshop being fitted with all the latest appliances and labour-saving machinery, specially adapted for their class of work, they are, therefore, in a position to undertake and execute all orders with the greatest despatch and economy.

M. & M. hold large stocks of best St. Petersburg Redwood and Teakwood, all thoroughly seasoned before being manufactured. Teakwood is now extensively used, especially for houses requiring a high and moist temperature, and is strongly recommended for all classes of work on account of its great durability.

M. & M. have made a special study of the Heating of Mansions-Houses, Churches, Schools, and Buildings of every kind, and are prepared to formulate schemes and carry out the complete installation. Only the very best materials are used for all their work, while their workmen are specially trained ; they, therefore, can guarantee that all orders entrusted to them will give entire satisfaction.

Estimates are made up at lowest remunerative rates.
